

THE WORLD OVER

DOES IT MEAN SUPPRESSION?

GIANTIC LOAN TO BE FLOATED

SOVIET WOULD SELL RAILWAY

NEW POSTAGE RATES APPROVED

FARM & RELIEF INFLATION BILL

LONDON—Lord Halifax, Secretary of War, told the House of Lords it was his opinion any attempt on the part of Germany to re-arm would be a breach of the Treaty of Versailles and would bring into operation sanctions provided by the Treaty. During the course of a disarrangement debate, Lord Halifax said, if Britain's proposal before him, Germany declined to participate in further discussion of the world disarmament conference, or walked out of the conference, she would be rejecting offers which would be fulfilling of pledges and would incur responsibility for failure of deliberations which might result. If Germany left the conference, he added, the course to be followed by the remaining powers would be a matter for the "nearest consideration."

A huge refunding and conversion loan, amounting possibly to \$70,000,000 will be launched within the next few months it was learned when notice of a resolution seeking parliamentary authority was given by Mr. N. Rhodes, Minister of Finance. The resolution asked authority for an issue of a maximum of \$70,000,000 and it was understood the issue will be for a very large portion of the maximum.

The rate of interest will depend entirely upon the market at the time of the issue, which will be late in the summer, but it is assured the government will seek the lowest possible rate. The general belief is that the loan will be sold to yield slightly more than 4 per cent.

MOSCOW—Russia told the Chinese Nationalist Government that China had no rights in the Chinese Eastern Railway in Manchuria and announced its intention of selling the line to the new state of Manchukuo.

Advancing the Sinking route directly by the Peking-Shanghai treaties of 1924 governing the joint operation of the Chinese Eastern by Soviet Russia and China, were considered void. Foreign Commissioner Maxim Litvinoff revealed the decision to sell the line to keep peace in the Far East.

Under the Peking-Mukden agreements the railway was supposed to remain to China, but in 1928 and any time before that year the Chinese Republic was given the right to buy the road from Moscow.

Ottawa, March 9.—The new postage rates for newspapers and periodicals, carried 40 miles and further, were approved by the House of Commons today in a bill sponsored by Prime Minister R. B. Bennett.

The bill provides that where the advertising space in the publication is 50 per cent of the total, or more, the postage rate shall be four cents a pound when carried more than 40 miles. The present rate is 1 1/2 cents. Mr. Bennett said the original proposal had been to increase the rates gradually where the advertising rates were less than 50 per cent but greater than 20 per cent. Representatives from publishers, however, had convinced the government this would be an undue hardship. It was established, the Prime Minister said, that under existing economic conditions a newspaper did not break even unless its advertising space was approximately 50 per cent of the whole.

WASHINGTON—The farm relief and inflation bill, launching the United States government on a price lifting campaign of huge proportions, is as good as law, approved finally by both houses of Congress and lacking only

Five Mills is Rate of Taxation in Carbon Municipality, 1933

Pound Keepers are Appointed and Scale of Wages Set

DR. McFARLANE HEALTH OFFICER

At the last regular meeting of the council of the Municipal District of Carbon No. 274 some important business was transacted in the way of mill rates, road work, etc.

Pound keepers were appointed for the year for the different divisions, as follows:

Division 1, L. B. Hart.
Division 2, P. O. Oshausner.
Division 3, Richard Garrett.
Division 4, J. C. Permann.
Division 5, W. R. Ferguson.

Division 4, to use name pound as Division 4.

The Reeve and secretary were instructed to purchase a car of culvert material at the lowest possible price. The scale of road work wages was set at this meeting, as follows:

Man and 2 horses, \$4.50 per day.
Single hand, \$2.50 per day.
Stick diggers to be appointed to run the grading outfit this year for the municipality.

Dr. McFarlane was appointed as Medical Health Officer.

The mill rates were set for both the Municipal and Hospital districts, as follows:

Municipal Rate, on all rural lands in the Carbon Municipality, 5 mills on the dollar.

Municipal Hospital rate shows a reduction this year and was set at 1 1/2 mills.

The next regular meeting of the M. D. of Carbon will be held on June 8th, at the Municipal office, Carbon.

Census Reveals Young Population

MORE THAN HALF CANADIAN PEOPLE UNDER 25 YEARS

More than half of the people of Canada are under the age of 25 years. They numbered 5,321,951 at the census and those who were 25 or over totaled 4,647,785. The population was 9,970,736. There were more persons of the age of ten years than any other age. The 10-year-olds numbered 322,136 and the number of less than one year olds 292,888. The 20-year-olds were 139,238 and the 15's 165,992.

It issued from Congress just as the department of agriculture tabulated figures revealing United States faces its lowest wheat production of the century, marking a start on elimination of the vast surpluses piled up in the past few years.

The wheat prospect, together with many indications of improving conditions in industry, raised questions as to whether it would be necessary to use many of the powers conferred by the Government approval of the bill. The bill vests unprecedented permissive powers in the president to devalue the United States dollar down to 50 per cent and in the secretary of agriculture to raise commodity prices through marketing agreements, production control and a processing tax with compensatory tariffs on competing foreign products.

ONTARIO FREIGHT RATE ON COAL DOWN TO \$3.50 A TON

Reduced freight rate of a 50 per cent for Alberta coal to Ontario has been put into effect, or will shortly be put into effect, according to word received by the Drumheller Mail last Friday from a reliable source.

While no official confirmation could be obtained locally, it is stated that the announcement was not unexpected as efforts have been made to bring down the rate from \$4.75 for the purpose of providing a higher eastern market for Alberta's domestic fuel.

Drumheller Mail.

News of Carbon District Many Long Years Ago

May 15, 1924

The barn and machine shed of W. Hay, about three miles west of town, were destroyed by fire Saturday morning, May 10. The fire was a total loss, no insurance being carried.

The Carbon golf club has re-organized. Officers elected were: President, J. O. A. Letourneau, Vice-president, J. J. Bennett; Sec.-treas., L. P. Osh. Executive committee, Messrs. J. Osh. H. Brown and MacDonald.

The dedication of the Maanville hall took place on Tuesday evening, May 13. Visiting brothers were present from Drumheller, Rockyford, Arcan, Three Hills, Trochu and other points.

The football team is now practicing every Wednesday afternoon.

Carbon will hold a four-day Chautauqua this year. The dates are June 10, 11, 12 and 13.

Mrs. D. Smith left Wednesday afternoon for a visit to her old home in England. Before taking the boat to the old country she will visit with relatives in the Eastern States.

A delightful party was enjoyed by a few friends at the home of Mr. and Mrs. Sam Garrett on Monday evening.

Further Relief On the School Land Payments

Further relief to holders of school lands in the Province, whereby they will have opportunity to retain possession of their land, was announced by the School Lands Sales Agreement, in view of the abnormally low level of agricultural products, is announced by Hon. R. G. Reid, Minister of Lands and Mines.

With respect to purchasers who believe themselves to be in a position to complete their sales contracts, but who under present conditions are finding difficulty in meeting all payments, the Government announces that a purchaser making payment on account of interest out of the 1933 crop will be given additional credit of an equal amount on the books of the Department, this credit to be applied first to account of interest and then on account of arrears. In other words any payments on account of interest will have double value for the purchaser. This arrangement will be made retroactive to apply to payments made since the first September 1932, so as to include any payments on account of interest made out of the proceeds of the 1933 crop. In the comparatively few cases where the credit so calculated will be in excess of current interest and arrears the balance will be applied on account of next year's interest. With respect to purchasers who are in arrears, the Government will not press for immediate payment of the sum due.

John, who was visiting in a distant city, received a telegram from his wife reading: "John, you remember you are a married man."

His answer read: "Telegram received too late."

Chronic

CARBON, ALBERTA, THURSDAY, MAY 10, 1933

TO CRDE ROAD SOUTH CARBON PAST POLE LINE

We have been advised that the Municipal District of Carbon has decided to grade up the road south to the Central Service Station, on the pole line, and that work will be done as soon as weather conditions permit.

This road will be made into a standard grade and all low spots will be filled in and in this way it is to be hoped that drainage will be ample and that down the road the numerous mud holes now in the roads after a rain.

When the grade is completed it is stated that while it would not be in first class shape to pass government inspection for gravel, it will be in good shape and that the hills would probably be gravelled with local gravel.

It is to be hoped that a good road will result, and that in the very near future the government will see the necessity to grade the road and thus give Carbon an outlet to the gravel highway.

ALBERTA NEWS

Homesated Entries

The provincial lands department during the first quarter of 1933, issued 153 homesated entries, here listed in January, 1933 in February and 191 in March. In the financial year ending March 31, 1933, there were 1,459 entries in all. The entries for April were 156, of which 28 were granted to women.

Unemployed Become Gold Hunters

Equipped with well constructed "grizzlies" for washing gold, some 70 unemployed will enter the gold hunting business along the Saskatchewan River within the next week or two. The equipment has been constructed under supervision by the men themselves. One outfit will require 50 men to operate, and there are other units requiring six men each. The new equipment is much advanced over the old-fashioned "grizzlies."

Investigate Milk Prices

Announcement has been made that the public utility commission of the province will commence an investigation of the milk price situation in Edmonton and Calgary within the next few days, under the new powers of legislation passed during the recent session.

University Feders' Day

The 32nd annual Feders' day will be held at the University of Alberta farm on Saturday, May 27, with a full day's program. There will be a presentation and discussion of the livestock experimental work of the year. The university extends an invitation to the interested to be present on the week of May 25.

National I.O.E. Convention

The national convention of the I.O.E. of Canada, will be held in Alberta this year, taking place at Edmonton during the week of May 25.

Alberta Fire Losses

Fifty per cent fewer deaths and a smaller property loss will over a half-century have been avoided, says the preceding year, are charged up against fire in Alberta during 1932, according to the annual report compiled by the provincial fire commissioner's office. The death list numbered 12, against 24 in 1931. This is the smallest number on record in any one year. Nearly all the deaths caused by fire were of children under 15 years of age. There were 1,000 of all kinds last year, causing property losses of \$2,495,491. For the preceding year the figures were 2,067 and \$3,137,724. From 1926 to 1932, but years inclusive, the total property loss from fire in Alberta was \$23,067,123.

Brooding and Rearing Turkeys Artificially

At this season of the year many farmers are wondering how to raise their turkeys. They have asked if turkey eggs on hand and no broods hen with which to incubate them. It is not uncommon for large numbers of eggs to be wasted waiting for a chance or turkey hen to go broody. Artificial incubation and brooding are entirely satisfactory and the provincial

MORE RAIN DELAYS SEEDING

While most of the farmers in the Carbon district have commenced seeding, and many have finished wheat seeding, there is still plenty of wheat land to be cropped and intermittent showers the first part of the week have again delayed operations.

A number of farmers who had wheat in the stock or south since last fall, have been harvesting this grain lately and while some report poor yield and lower grades, others are quite satisfied with conditions and returns. The rise in wheat prices since last fall has materially increased the returns from the 1932 crop, of those late harvesters.

Weather conditions are still unsettled and daily showers are prevalent. Everything points to another wet year.

Many in South District Report Seeding Done

Ed and Emil Oshausner purchased a 16-20 McCormick Deering tractor Saturday, from the local agent, W. Paxon.

Mr. and Mrs. Archie Oshausner, of Calgary, are visiting in the district with their children.

Adam Bertsch has sold his half-section farm on the pole line to C. G. Gitt, the deal having been made on a bushed basis.

Mr. and Mrs. Rudolph Bertsch, of Calgary, came out on Saturday and will spend the week visiting friends in the district.

Mr. Otto Oltiel was visiting with his parents at Crossfield on Sunday.

Miss Katie Kay went to work on Monday for Len Hay.

Quite a few farmers south have completed their seedling operations for the year, having settled up their commitments the first of the week. This is considerably in advance to most parts of the Carbon district and farmers are quite optimistic as to the returns this coming fall.

Mr. and Mrs. Gottlieb Oshausner, of Turner Valley, were in the Carbon district on Sunday visiting with their children.

Mr. and Mrs. Sam Oshausner and family moved to Drumheller on Saturday.

Mr. and Mrs. J. J. Bertsch and Mr. and Mrs. John Wolf went to Medicine Hat on Tuesday and will spend a few days there.

Miss Emma Klein, of Trochu, is staying with her sister, Mrs. J. S. Bertsch.

country commissioner and in the end usually insure more turkeys being raised than if done in the natural way. It is true that in incubators one does not get as large a percentage of poults but brooding artificially seems to give better satisfaction with less loss and quicker growth than when the poults are brooded with hens. For incubation, a temperature about one degree less than for chicken eggs gives some good results, with the moisture slightly increased. As soon as the hatch commences, the birds are thoroughly dry. The young poults should be removed to a colony brooder, or where better results are obtained, into the turkey brooder. As most turkeys are hatched in May and June, an old brooding colony brooder will usually supply sufficient heat and is more easily controlled on warm days than a coal burning brooder, although either will give good results.

CARLAND SAYS NATIONAL ROAD IS OVERMANNED

The Canadian National Railway is over-stuffed in its technical department, E. J. Carland, member for this, the House of Commons, charged recently in the House of Commons. The construction department in western Canada alone had added \$30,000,000 in excessive costs to the railway.

In comparison to the Canadian Pacific Railway, the Canadian National's branch line construction costs were excessive, Mr. Carland said, claiming too many high-priced engineers. Canadian National costs had increased from \$40,200 a mile to \$51,600 a mile. Canadian Pacific costs had been reduced from \$25,400 to \$20,200 a mile. This represented \$50 a mile in cost, charged to the national railway.

The construction department, in the west, continued Mr. Carland, had not been reduced from the days when the branch lines were being built. He asked why the highly paid engineering staff were retained in the service while running trades were reduced and men thrown out of the service. Apparently there was no curb on the activities of the construction department and the \$30,000,000 in excessive costs "might just as well have been thrown in the sink."

NO NEED TO TAKE HARSH LAXATIVE

Bitter doses may help constipation but they are often too harsh — and always hard to take. There is a gentler way to restore normal elimination. Recall Ordinaries are the original choline phenolphthalein laxative — just as easy as candy. And they move through bowels easily and thoroughly. No cramping or irritation. Even if some corrective must be taken every day, you'll find them easy always. Ask for them at McKibbin's Recall Drug Store. Tin of 60—50c.

Sherlock Holmes At Local Theatre Monday Night

ACTOR FEELS MASTERLY CHARACTERIZATION OF DETECTIVE IN FOX FILM

"Sherlock Holmes" a Fox film offering a first class, with Oliver Brook playing the role of the famous criminalist will provide a treat for the lovers of intense drama at the Carbon Theatre on Monday night.

Brook gives to the character of the great detective the quiet and whimsical humor that "Connie Reid" injected into his widely read stories. From beginning to end, interest is sustained in the unusual and thrilling plot in which Holmes battles with Moriarty, the master criminal, and the racketeers his arch enemy has imported from America.

Holmes' methods employed in dealing with the crooks who inaugurate a reign of terror in London, might be adapted to the role of the detective. For the actual, fascinating unraveling of the plot, you will have to visit the Carbon Theatre and find out for yourself how it is done.

You know "Johnny I'm surprised—Do you know any more jokes like that?" "Johnny—Well, yes, teacher."

Teacher—"Well, any other school."

"Fresh from the Gardens"

The International Way

The more extensively a person reads apparently authoritative articles and books dealing with present day economics, the more intently he studies, investigates, and seriously ponders over political, economic and social problems with an open and discerning mind, the more such a person becomes convinced there is, after all, only one way by which solutions for existing problems and difficulties can be reached, and that is the international way.

Consider the Canadian position as an example, and the situation in this country is in most respects similar to that existing in other countries throughout the world.

This Dominion is a land of great natural wealth; its people are intelligent, progressive, and anxious and willing to work. They have enjoyed a high standard of living in the past, and desire it to continue. They possess political and religious freedom, and have inaugurated and maintained social services for the benefit, not only of individuals but for whole communities and the nation.

Nevertheless, at the moment, the development of natural resources of Canada, our great reservoirs of potential wealth, is at a standstill, while hundreds of thousands of men and women remain unemployed and approximately one and a half million of the population are subsisting on relief provided by the State. The standard of living is falling, not rising; social services are being abolished or curtailed; the burden of public debt is growing every day, and heavier and ever heavier taxes are being imposed.

What is wrong? Is Canada, and the Canadian people, alone to blame? Are they even chiefly to blame? Are our public men in Governments, Parliaments, Legislatures, Municipal Councils, our bankers and financiers, our captains of industry and transportation; our leaders in commerce and business and agriculture; our leaders in church and education, are these chiefly responsible? Is it the system in vogue in Canada under which all their life activities and institutions have been operated and governed in the past, and under which great progress was made, responsible for the present breakdown?

Some short-sighted people will thoughtlessly say "Yes," and will try to convince others that the whole trouble lies in the system and that Canadians, if they will, can solve their own, and by their own action; that all they have to do is to change the present system, and create a new one based on an entirely different set of principles. And the same thing is being said in other countries.

This, however, is a superficial view. Suppose Canada could tomorrow create within its own borders an absolutely ideal 100% perfect monarchy, banking and credit system, while other nations adhered to their present systems and methods, would that solve Canada's problems? Intelligent men and women realize it would not.

Suppose Canada tomorrow adopted absolute free trade with the world in an endeavor to again revive the exchange of commodities and once again set in motion all the great activities bound up in trade and commerce, while other nations adhered to their present policies, would that put Canada's unemployed to work and revive Canada's Agriculture? Again, the answer is decidedly "No."

The solution for our present economic problems is not to be found in a complete change in the system now prevailing in Canada—that would merely result in still greater unemployment, in confusion ending in chaos, and more widespread loss and suffering—but it is to be found in international action. It is only so it can be found.

But what Canada and the Canadian people can do, and ought to do, and, we believe, are striving to do, is to encourage, such a national action, and to create those conditions and ideas in the minds of the people of other nations that will make such international co-operation and action possible. This Dominion can show to the whole world that it is ready and eager to join hands with any other nation, or any group of nations, in the task of breaking down narrow nationalistic ideas, suspicions and fears. Every opportunity that presents itself, and where they do not present themselves, Canada should make them, and make them small if they can be quickly grasped, and Canada should indicate, without reserve, that it is prepared to go a long way in the direction of meeting other nations and peoples in providing needed solutions to existing problems.

Organized labor has the right idea in its international labor brotherhoods organized for mutual protection, but, unfortunately, even within those brotherhoods a selfish nationalism existed, with the result that organized labor in one country proceeded to support selfish trade policies designed to protect themselves but to do injury to their fellow workers in another country. The folly of this has been brought home to them in these years of depression, just as it has been brought home to the farmers and great world traders in all countries. Narrow nationalism simply went wrong. That is what is fundamentally wrong with the prevailing system—the attempt of each nation to shut itself up in a watertight compartment away from all other nations, and in so doing is slowly but surely starving itself to death.

The tearing down that is necessary, is the tearing down of the whole network of wide extending and barriers of one kind and another that the nations have erected against each other. The destruction is called for of the destruction of the narrow nationalistic ideas and fears of people. Let the nations get off the by-paths of narrow nationalism and on to the broad international highways of the world, and the depression will pass like a mild before the rising sun; unemployment will give place to industrial and business activity everywhere with the workers of one nation not begrudging work to other nations; and each nation, and each industry, as they would be; and the primary producers on farms, in forests, fisheries and mines will again enjoy adequate markets and remunerative prices for the things they produce.

The international way is the world's highway; the international method is the Twentieth Century Method.

The United States is the largest consumer of asbestos in the world.

Java has an extensive back-to-the-city movement.

England has 3,500,000 dogs, according to a recent census.

Australia has banned all cure-fallacious advertising.

Pains Around Her Heart Tired Out After Doing Housework

MILBURN'S HEART NERVE PILLS

My dear friend, I have had pains around my heart and each morning, after doing a lot of housework, I seemed to get dizzy and feel all tired.

Being that Milburn's Heart and Nerve Pills were good for these troubles I sent for a box, and after taking the first five I felt a new day dawning. I felt a whole lot better. Since then I have had no more of the dizzy spells and pains around the heart.

For sale at all drug and grocery stores; put up only by The W. Milburn Co., Ltd.

Needle and Pin Industry

Little English Town Supplies Practically All World Requirements

At a recent banquet of the Needle-makers' Company the Master stated that last year Great Britain manufactured 750,000,000 needles. Most of them were made at Redditch, in Worcestershire. Nearly all the needles, all the pins and all the fish-hooks in the world are made at Redditch. Nearly everybody in Redditch is employed making needles, pins and fish-hooks, and their ancestors have done so for hundreds of years. The Redditch factories are the most efficient in the world and are in an impenetrable position.

If they turn out 750,000,000 needles a year, that means that in two and one-half years they make enough needles to give one to every human being on earth. Query: where do the billions of discarded needles go? The disposal of safety razor blades is an awkward problem. What about needles and pins? They must be put somewhere, else there would be no demand for hundreds of millions of new ones each year. In fifty years Redditch must produce enough needles and pins to carpet the earth and seven seas. Yet one scarcely hears of others—St. Thomas Times-Journal.

Needles, pins and fish hooks are just one branch of manufacture that Great Britain stands supreme in. There are a host of others—St. Thomas Times-Journal.

Worked For Progression

Mrs. Mary Ellen Smith Was One Of Canada's Outstanding Women—Used her own initiative in international work, with an emphatic ring to it, to be applied in contemplating the career of Mrs. Mary Ellen Smith, womanly, capable and energetic, who, at the age of 72 years, Mrs. Smith, the first woman Cabinet Minister in the British Empire, and at the same time, one of the B.C. Legislature, was useful to her adopted province and to Canada and even the Empire at large, for many a year. Her interests, her contacts, were many, but every one of them counted for something. Mrs. Smith was a worker for the good and the progressive in life. She was a pioneer in the woman's suffrage movement in Canada; in the registration and set out she championed the cause of women and children, with minimum wage legislation, better working conditions in factories and the shop and in many kindred matters. Educational movements, patriotic movements, whatever spelled reform, and a forward look, immediately and enthusiastically invited her attention.

Mrs. Mary Ellen Smith, whose husband, before her, left his mark upon Canadian life as a member of the House of Commons and later as Minister of the Interior, was one of Canada's outstanding women.—Regina (Evening) Leader-Post.

Seal Herd Going North

Encouraged By Canadian and U.S. Vessels To Prevent Poaching On way north to breeding grounds on the Pribilof Islands, Alaska, huge herds of approximately 1,500 fur seals have been sighted off the Washington coast. They are followed to the international line by United States patrol cruisers and at that point Canadian vessels take over the assignment. At the Alaska line the Canadian vessels withdraw and the United States cutters resume the journey.

The object of the escort is to prevent poaching. Under the terms of the Washington Convention of 1911, all fur seals is forbidden except by fur seals, in canoes, and armed only with spears, bows and arrows or harpoons. Poachers and rifles are banned.

Too Much Work

Unique postman in Estor, Saginaw, Japan, whose route was over rough roads, saved up the mail for three years with the intention of depositing all the letters on one trip. When he had collected 4,000 letters he was still tired and burned the lot.

Academy Rejects Painting

A painting by Mary Symons, entitled "The Last Supper," and depicting Christ and his apostles in lounge suits, collars and cravats, seated at a modern table, has been rejected by the Royal Academy of Britain.

A Valuable Penknife

The largest penknife in the world is now on show in London. It was made in 1851, and has 1,051 blades, one of which can be opened. Each blade is a perfect penknife. The knife weighs over three stones. An offer of \$7,500 for it has been refused.

New Fire Fighting Inventions

Use Only Water To Put Out Oil Fires

Some new fire-fighting inventions were described by Commander A. N. Firebrace, Divisional Officer of the London Fire Brigade, in a lecture before the Royal Society of Arts. One was a method of putting out oil fires with water only. Another was a fluorinated appliance which extrudes small fires by pumping on to them big drops of soda water and carbon dioxide gas—the gas obtained by purifying and treating the exhaust gases of the internal combustion engine which propels the appliance. The system by which oil fires are put out with water alone has been evolved during the last year. It has received the approval of the Board of Trade for ship installations and has been fitted in some instances on shore; but so far it has only had a chance to prove its worth under test conditions. Water sprayers are so fitted that the space, concealed or otherwise, can be bombarded with spray under pressure. The bombardment of the surface of the oil breaks it up into a multitude of tiny globules, each surrounded by a thin film of water. This emulsion, as it is called by chemists, will not burn, since the flame only reaches the water film surrounding the oil globules. The surface of the liquid being thus non-inflammable, the fire at once goes out.

Gasoline Tax Refunds

Will Be Subject To A One Cent Deduction In Saskatchewan Gasoline tax refunds to Saskatchewan farmers operating on private land will be subject to a one cent deduction to cover the cost of administration effective as from January 1. Announced by the Minister of Finance in this policy was made by Hon. A. C. Stewart, Minister of Finance.

Death Penalty For Theft

Soviet Authorities Make Drastic Order To Stop Grain Stealing North Caucasian authorities have ordered death penalties to prevent theft or diversion of seed grain loaned by the central government.

Deaths were made the penalty not alone for the thieves themselves, but also for officials whose negligence made the thefts possible.

The Moscow press attributed grain thefts to sabotage by kulaks.

Umbrellas are to be supplied free of charge to patrons of a movie theatre in Madrid, Spain, in case of sudden rain.

An evening air service between London and Paris has just been inaugurated.

When Your Daughter Comes to Womanhood Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for a few months. Teach her how to take it. It will make her health as critical time. When she is a happy, healthy wife and mother she will thank you.

Preparing For World Economic Conference

Representatives Of Sixty Nations Are Expected To Attend

Some 1,500 delegates representing sixty nations are expected to attend the world economic conference in London, England, which, it is expected, the organizing committee will summon for June 12. This is the best news London's hotels and shops have had since the world slump. Various delegations and embassies are already arranging receptions and dinners for the conference. The sessions will be held, geographically enough, in the London Geological Museum. Around a spacious hall 100 feet long and 150 feet wide, supported by towering pillars, the London post office is now rigging up telephone and telegraph facilities, which, it claims, make London the "switchboard of the world." In the centre of the room is a titanic twelve-ton statue of Hercules to inspire the modern Atlases in their work.

New Type Of Banana

Trinidad Produces Fruit Immune To Panama Disease

The discovery of a new type of banana from Port of Spain is expected to make economic history in Trinidad. Thomas Potter, the secretary of the Agricultural Society, told an audience the banana was of the same family as the local Carriacou Islands banana and was immune to Panama disease, but was the same size and color as the Jamaica banana.

It promises to meet all requirements of the export trade and is described as the "banana of the future." A government committee recently recommended the grant of £25,000 to develop banana exports from the colony. The Tropical College is now preparing. He referring to the best temperature for sea transport of bananas.

Market Is Improving

Japan Is Buying More Of Canada's Raw Materials

Japan's market for Canadian raw materials is gradually improving, writes J. A. Langley, commercial secretary in Tokyo, in the Commercial Intelligence Journal. The wheat market is quite active, and while at price considerations, is entirely in the hands of Australia. However, in such foodstuffs as cheese and macaroni, the Canadian share of the market is going up monthly, particularly in macaroni.

The Prairie Field Crop Acreage

Over two-thirds of the field crop acreage of Manitoba is concentrated in the three prairie provinces, and most of this area is needed to the grain crops, with wheat predominant. Roughly speaking, the specialized wheat areas over the southern prairie plains from the Red River Valley of Manitoba to the foot of Alberta and attain their greatest width in central Saskatchewan.

Seed From Peace River

Farm-farmer world championship wheat of the Peace River will be needed in Newfoundland this season. Made up half of Howard and half of Macquis, a carload from Wembley, Alberta, has been forwarded to the Empire's oldest dominion. Part of the shipment came from the farm of Herman Treile, world champion wheat grower.

Old Roman ruins at York, England, are being ruthlessly to accommodate night visitors.

Should Be Investigated

Canada Might Develop Market In Japan

Japan recently placed an order for 200,000 metric tons of coal with various colliery companies in Mexico. It is understood that this order is a sample one, and that the Japanese government will make tests to discover the fuel value of the Mexican product.

The news has created considerable interest in Canadian coal mining circles. Vast quantities of bituminous coal are available for export from this country. Its quality is good; and, as accessibility, in many areas, so that the labor of mining involved should enable it to enter world markets at moderate prices. If Japan has a market of any size for the type of coal that Canada can supply, it is one that should be thoroughly investigated. Any opportunity of making employment for labor and giving an outlet for capital investments, is of special mention in these difficult times.—Winnipeg Free Press.

Modest Tariff Policy

U.S. Finds Extreme Isolation Greatest Danger To Roosevelt's Secretary

President Roosevelt's secretary of state, Cordell Hull, told the American section of the International Chamber of Commerce, in an impassioned speech, that America must lead the world back to international trade, and asserted extreme isolation is the "greatest danger to world peace."

Pointing to the huge sums owed to the United States, the secretary asserted the country's policy since the war has been to insist that these obligations can be paid only in gold, services, or favorable trade balances. He referred to the administration's position as one of "reasonable, moderate, decent" tariffs, "no tariffs, nor even low tariffs."

Now You Tell Me

Tennessee Man Had Hog Weighing Ton and Half

"Big Bill," king of porkers, is dead. Heralded by his owner, Walter Chappell of Martin, Tennessee, as the world's biggest hog, "Big Bill" tipped the scales at 2,500 pounds. Chappell planned to fatten him up to 3,000 pounds and take him to Chicago for the Century of Progress Exhibition.

"Big Bill" was willing, but a foreman of the farm, who was afraid of the much pounds and caused paralysis Chappell, tore in his eyes, ordered the heavyweight Poland China boar chloroformed, and today a taxidermist here has been commissioned to make "Big Bill" size a figure for future generations to marvel at.

The oldest skin in the world is in a museum in Stockholm, Sweden. It is believed to be 8,000 years old.

A BOARD OF TRADE OR A RATEPAYER'S ASSOCIATION

From time to time the need arises
for a live board of trade in a town to
take up the various questions re-
lative to the general welfare and as-
sure advancement of a community.

Such conditions are now at hand in
the Carbon district in the line of a
letter train service and a gravel road.
Both questions need some organiza-
tion to take the initiative.

A board of trade or ratepayer's as-
sociation is the ideal organization to
take up civic matters.

While agricultural and general condi-
tions are not as favorable, as they
were in 1928 and 1929, this is no reason
for the community to go backwards,
and the business men to crawl in a
humble wait for a change. We must
make the change ourselves and result.

along this line can only be obtained
by co-operation.
Therefore, let us co-operate—join
together for the common good of the
district—and revive the old board of
trade or form a new organization to
take its place and to include the farm-
ers as well as the business men of the
town.

We have faith in Carbon and believe
a town of its size with its coal mines
and surrounded by such fine farming
land has every opportunity for ad-
vancement, but it needs the optimism
and spirit of the citizens to bring about
new changes, all of which will be for
the betterment and to include the farm-
ers to take an interest in the de-
velopment of town and district.

Let's get together and organize—
plan for the future, and forget about
the past.

DID YOU EVER STOP TO THINK

Edson R. Wallie of Shawnee, Okla.
writes that the present plight of
many industries has been brought
about by the high prices of the past
more than by the low prices of the
present.

It seems that in some towns the
people are satisfied to sit down and
lament over the past and give no
thought to the future. If they want
to make up, they must get behind some
real leaders, they might just as well
let home city die and have some one
to lead the funeral oration and the
five ones move on to some other town.

The virtues of government owner-
ship if business in competition with
its citizens may be attractive in theory,
but too often becomes a mirage in ac-
tuality.

Unemployment lends to physical as
well as mental demoralization.
Most towns would be ready for a
Receiver in time if some of its busi-
ness men don't have spirit enough to
give a little more time and money to
organized effort in community develop-
ment.

Some men have their vision obscured
by the darkness cast by their own
shadows. Nothing satisfies them be-
cause they are unable to please them-
selves.

Been trying my best to figure out
just what our politicians are trying
to do for us, for us, or what they
are trying to keep from doing. The
more you read the more confused you
become.

Better business comes to the concern
that helps itself by newspaper
advertising.

The town that gets the publicity gets
the business.

THE CHRONICLE'S PART

REDS. NOTE—The above paragraph
although only two lines "The town that
gets the publicity gets the business"
is significant of what would happen
to the town's business without the
newspaper. For instance, should this
newspaper be published in Scotland,
instead of Carbon, where would the
bulk of the trade actually be done?
Think this over Mr. business men and
give the local printing establishment
every encouragement by having ALL
your printing and advertising matter
executed in the local printing office, and
through the columns of the local
newspaper.

Direct examples of this fact has
been proved since the Carbon Chronicle
has been circulating during the past
year in the Ghost Fire district. Print-
ers are now trading in Carbon who
never before even thought of coming
to Carbon for their needs. They want
to Three Hills, or Drumheller. The
Carbon Chronicle does not benefit by
this increased circulation, because in
all most every case the thirty old
families are receiving the paper as a

The TIRE With EXTRA PROTECTION

The "different" construction of
Gutta Percha Tires means extra
safety for you.

In every Gutta Percha Tire, extra
protection is given through Gum
Cushions, broad pads of pure gum
rubber built in between the layers
of cord fabric to absorb bruising
road shocks, and prevent damage
to the cords.

Buy Gutta Percha Tires with con-
fidence—there's 50 years experi-
ence of making quality rubber
products back of them.

STRONGER. SAFER. CONSTRUCTION

GUTTA PERCHA Tires are made of the
finest quality of cord fabric, each strand im-
pregnated and insulated with rubber to prevent
cord chafing.

GUTTA PERCHA Tires have extra
width of tread which gives extra traction
and extra protection from skidding.

GUTTA PERCHA Tires have extra
width of tread which gives extra traction
and extra protection from skidding.

GUTTA PERCHA & RUBBER, LIMITED
Head Office: Toronto Branches from Coast to Coast

GUARANTEE

Gutta Percha and Roadcraft Tires are
sold with a guarantee for twelve months
from the date of purchase for passenger
car service against any condition that
may render the tire unfit for further
service, where such condition is due to
ordinary wear and tear or injuries there-
to caused by blow-outs, cuts, bruises, rim
alignment, faulty brakes, or any other
road hazard.

GOLDEN JUBILEE
50 years ago, in 1883, this
Company commenced the
manufacture of rubber goods
in Toronto. Today, the
Gutta Percha & Rubber, Limited,
and it has grown to be the
largest all-Canadian rubber
company. The factory shown
above employs 1,500 people,
and covers an area of 12 acres.

complimentary copy, in order to add
the town and it's business men to se-
cure additional trade. For this reason
every man in business in a town ought
to be using advertising space in the
local newspaper as indirect advertis-
ing—for he certainly gets it. And
every advertiser using space should
allow a certain per centage as indirect
advertising. And we believe that our
present steady advertisers have taken
this view—and they have profited by
their advertising.

"Did father leave an order with you
this morning for a load of wood?"
asked a strange but attractive young

body of the yard man.
"I don't know miss," he said.
"There was a gentleman in who said
he'd deliver a load to a driver who would
call and said it was for Mr. Zell."
"Yes, thank you," said she. "I'm
Gladys Zell."
"Oh, what?" replied the man.
"I'm Gladys Zell," she repeated.
"Oh, yes, of course," he replied. "So
am I."

Young Man: "Darling, our engage-
ment means everything to me. I'm in
the seventh heaven!"
Flairce: "Oh, indeed. And who are
the six girls you've been engaged to
before?"

In Russia it is possible to get a per-
mit to buy railroad tickets without
standing in line. One man having this
privilege rushed his way to the win-
dow and when the lines waiting pro-
tested he said "But I have a permit to
buy a ticket without standing in line."
"So have the rest of us," came the
reply. "This is the line for persons
who have permits to buy tickets with-
out standing in line."—Boston Trans-
cript.

CHAPTER X—Continued.

"That probably means they went southwest," Alan remarked, and his short laugh was not pleasant. "You be natural and easy-like, but it won't get by with us. We've nailed two many liars in our time. I want to know who this party of yours is, where they came from, how they got into this country, how they know their way about it. I want to know who that pack of otter pelts got into. I want to know the man who killed Jimmy Montgomery there on the 'Midnight Sun'." Now get busy.

He clicked the safety on his automatic and brought his elbow up against his side.

Chink Woolley trembled, his knees shook, he wilted. He guessed that this man must be the Baker fellow, the sergeant terrible, whom Mett Andre always mentioned in lowered voice. Those hypnotic gray eyes seemed to be boring through him. That heavy automatic was tilted to make his next lie the last. And if he turned king's evidence, he might escape the noose.

It was a strange story that Alan and Bill listened to, in the island in the heart of Many Waters. Eighteen months ago, on a whaler in Beaufort sea, the five whites, excluding the half-breed Andre whom they picked up later, had "run a buck" under Jensen's instigation, but were overpowered by the captain and rest of the crew. Flung ashore with the skipper's suspicious good wishes at bleak Demarcation Point on the Arctic coast, they made their way across the Romanoff's to the new placer fields in the Kayukuk headwaters. They came too late to get worthwhile claims; and they died, as, too, that "hawking" in the perpetually frozen subsoil was even harder work than whaling.

It was Jensen, brooding over their predicament, who conceived the idea that it was easier to find gold which already had been found than to thaw a hole thirty feet down to black sand and bedrock and then maybe get nothing. It was Jensen who allayed their fears and dangled the golden lure in front of their eyes till their mouths watered and they were ready for anything he planned.

Andre the half-breed was a find. He fitted into the party like a key into

a lock. They were mostly ignorant of the country; they were tyros when it came to travelling, hiding, living in the bush. But Andre the "breed" was bush-wise as a weasel and water-wise as a muskrat, and he knew the whole north country from Illoo to the coast to Point Barrow as he knew the palm of his hand.

It was Andre who had brought the mate into this strange country, by back rivers and untraversed trails, avoiding all sign of men, so that they seemed to have dropped from the sky. It was Andre who suggested the place of attack on the "Midnight Sun," and the Tala-Akka as a place to hide in after the swoop and robbery. And it was "breed" Andre's sharp-speaking Savage that drilled Jimmy Montgomery through the heart.

Alan Barker breathed a little harshly, he ordered, "Describe that 'breed'." And he added, "So there will be no mistake when I meet him."

Woolley described his most confederate. Alan nodded curtly. After a few moments' silence, he spoke again: "Now about Trader MacMillan. How did that pack of furs get in his shed?"

"Jensen put it there."

Why did he not know all the details, but from hints Jensen had dropped he was able to piece the story together pretty well.

Several years ago at Herschel Island, that gathering place for whalers, Indians, traders, Eskimos and Arctic explorers, Jensen had run afoul of Dave MacMillan. He had come ashore from a whaler, hungry for fish and hungry for women's company after eight months of following the herds. He had found the drink, and in a whiskey haze had started to make rough love to fifteen-year-old Dave MacMillan full upon him.

For years now Jensen had been nursing his hurt pride and the incident that snowy October day. The incident had snowed in his vengeful soul; and when his party passed the trading post, it had flared out. It was a neat stroke, putting that comparatively worthless bale of furs in the shed of the man who had dog-whipped him over the shingle to the whaler.

He had never forgotten the MacMillan girl and the incident that snowy October day. The incident had snowed in his vengeful soul; and when his party passed the trading post, it had flared out. It was a neat stroke, putting that comparatively worthless bale of furs in the shed of the man who had dog-whipped him over the shingle to the whaler.

He had counted on the trader discovering them, wondering about them, innocently calling the attention of the local police to the incident that snowy October day. The incident had snowed in his vengeful soul; and when his party passed the trading post, it had flared out. It was a neat stroke, putting that comparatively worthless bale of furs in the shed of the man who had dog-whipped him over the shingle to the whaler.

fit men win

Nothing lowers and does more than the poison of unexercised constitution. Take one every morning.

TAKE BIG FRUIT SALT

that time, in the power of the man who had left only thirty-four dollars. They had a chance of beating them to the trading post.

Whitling on Bill he ordered: "You stay here. You attend to this end of it. Buzzard and I will attend to the other. We'll go after them in the 'plane. There's a chance we before they do. You'll have to wait here. They're intending to come back here after the gold. If anything happens to Buzzard or me, you'll be left, you'll have to turn on him. I'll be all up to you."

He turned on his heel and ran down to the canoe and skinned out to the waiting plane.

"Get back to the Alaska, Buzzard! To Joyce's home!" He pleaded quickly. "For C. D. sake make it straight and fast!"

No one appeared at the doorway of the trading store. No one, with half-shimmering in the sun, came running down the path to greet them.

Their shouts at the landing brought no answer from a girl's lips or from old Pence. In some measure prepared, Alan called Joyce's name as he strode into the trading hall. He called but once, he looked but once into her room.

He had never forgotten the MacMillan girl and the incident that snowy October day. The incident had snowed in his vengeful soul; and when his party passed the trading post, it had flared out. down, examining the broken twigs, the wilted leaves, the crushed nettles, he read that all this had happened three hours ago and that the criminal was thirty or forty miles up the spruce-buried Alaska, with Joyce their prisoner.

(To Be Continued.)

Work Savors Of Magic

English Potter Makes Flower Pot By Hand In Twenty Seconds

Today in modern England you can see potters working in the same way as they did in the times of the Bible. The reason is that every garden flower pot is moulded by hand on a wheel practically identical in design with that used in biblical times. There's no need for machinery, for the potter can make a pot in twenty seconds.

One large pottery is in Sussex, a county famous for its clay. The clay lies in layers. The top layer is used for bricks; next comes the yellow "red" clay, and finally the red red pottery clay—strongest of all—which is made into flower pots. The clay is first dumped into tanks of water.

Then it lies for a week. Thence it goes to the mill and is finely ground. From the mill it is taken in half-gallon weight buckets to the room where the "pot spinners"—as they are called—sit at their wheels.

A spinner first weighs out his lump of clay—1½ lb. goes to a 5-in. pot—and piles them up beside his wheel. The wheel which is horizontal, stands in a shallow sink, half-full of warm water. The spinner seizes a lump of clay, puts it in the water, slaps it down on the wheel and covers it with his two hands. At the same time he works the wheel with his foot. In a few seconds up rises a dummy pot. A few seconds more, and the pot is finished.

It has risen to its full height, complete with rim. The whole business savors of magic. Promptly the spinner slips a piece of string beneath the finished pot and whips it from the wheel. It falls in his hand as though made of rubber. It takes twenty seconds to make a five-in. pot.

THE RHYMING OPTIMIST
BY ALAN BARKER
FLYING DAYS

The days are short; almost we see them fly.
Blue wings of morn and purple wings of eve.
And we, who watch the hours passing by,
Can scarcely welcome them before they're gone.

We would not seek to stay the moving throng,
Or ordered marching of the stars through space.
Why, then, must we be still dissatisfied,
That time goes ever at a breathless pace?

In all the universe there is no pause,
No change in change on never-ending wheels,
And all who seek to read the cosmic laws
Must follow motion till their mind reels.

The days are short; why should we clutch to hold
Night's velvet wings or morn's bright wings of gold?

Must Disclose Transactions
Demand For Full Information From Brokers Is Legal

Brokers and financial institutions will be required to make a disclosure of all bond transactions of either purchase or sale, switches or changes from taxable to non-taxable issues or otherwise, that have been effected since the budget came down, according to the department of national revenue.

The purpose is to have a full and complete disclosure of all dividend and bond interest income in the income tax returns of all taxpayers. The department states that, under the general provisions of the Income Tax Act, there exists a legal authority for demanding this disclosure from brokers and financial houses.

Siamese consul-general at Montreal says Canada and Siam have much in common. White elephants

THAT DEPRESSED FEELING IS LARGELY LIVER
Wake up your Liver
Without Calomel

Little Helps For This Week
"Whatever they hand findeth to do, do with thy might."—Ecclesiastes 9:10.

"For even the Son of Man came not to be ministered unto, but to minister."—Matthew 23:23.

A child's kiss
Set on thy sighing lips, shall make thee glad.
A poor man served by thy shade
Thou shalt be glad to see him glad.

A sick man helped by thy shade
Thou shalt be glad to see him glad.
Thou shalt be served by thy shade
Of service which thou renderest.

A man is relieved and gay when he has put his heart into his work and done his best; but what he has said or done otherwise shall give him no peace.—R. W. Emerson.

Be diligent after thy power to do peace.—R. W. Emerson.

Think nothing too little, nothing too low, to do lovingly for the sake of God. Vain if thou mayest, a sick, relieve the patient, forego thyself and thine own ways for love; and He whom in them thou lovest, to whom in them thou ministerest, will own thy love and will purify His own love into thee.—E. B. Pusey.

Canadian Standard Measures
Though frequently used in Canada, there are certain standards of weights and measures in vogue in some of the United States that are illegal in the Dominion. The United States pint, quart, and gallon, for instance, are 10% per cent. less in capacity than the Canadian (Imperial) legal standards.

Insects To Save Oak Tree
Parasites have been commissioned to save three 60-year-old oak trees in St. Mary's churchyard in New Plymouth, N.Z. They have been attacked by a pest known as the oak saw. Scientists of Cawston Park have been asked to send them a special container, which has been fastened to the tree, and the hattie is on.

COOKERY PARLAMENT
brings better, richer, cheaper cooking. Combines odds, holds full flavours of meats, birds and vegetables throughout. Each agent can be used over and over again. Dealers, or write direct to:

TOWN & COUNTY
 Personalographs

Mrs. T. J. Johnson and son Tom re-
 turned Friday evening from a week's
 visit with friends in Edmonton.

Mr. and Mrs. Harley Wilson were
 Calgary visitors last week.

Don't forget that Wednesday, May
 26th, is Victoria Day and a public
 holiday. All places of business will be
 closed.

Alex Anderson of Drumheller spent
 the first part of the week in Carbon
 doing some plumbing work for Les
 Wilson.

Dick Gluski has been doing a little
 odd work in the district with the
 mechanical grading outfit, but was
 here last week.

Don't forget the dance to be held in
 the Farmers' Exchange hall on Tuesday
 night, May 26th. The proceeds are in
 aid of a new ramping system for use
 of the tennis club, and the curing and
 drying of milk, and everyone interested
 in these sports should drop in their
 duty to at least buy a ticket to the
 dance.

It. C. Willson expected to leave last
 night by motor on a business trip to
 Regina.

Alex Reid Sr., Mrs. Alex Reid Jr.,
 and Mrs. Myrtle Murray motored into
 Calgary on Tuesday.

Mr. and Mrs. Jensen have disposed
 of their store equipment and have
 moved to Calgary, having left last Fri-
 day for that city.

A number of the girls and boys of
 the Carbon public school motored to
 Trochu on Saturday to participate in
 the sports day there. The Carbon girls'
 soft ball team was successful in win-
 ning out.

Do you owe any accounts at The
 Carbon Chronicle office? If so, we
 would appreciate an early settlement.

SUBSCRIPTIONS TO THE CAR-
 BON CHRONICLE ARE DUE AND
 PAYABLE NOW. PLEASE LOOK AT
 THE LABEL ON YOUR PAPER AND
 IF YOU ARE IN ARREARS WE
 WOULD APPRECIATE AN EARLY
 SETTLEMENT.

Let Us Do Your
 Printing?

All business houses need more or less printed matter, all of which
 is within the possibilities of the local printer. Yet how prone
 many are to pass up the home printer and let the orders go to
 city offices which have no interest whatever in rural communities
 except to get printing orders and the cash to pay for them. Busi-
 ness men, remember that the home paper is constantly promot-
 ing the interests of the home community and you owe it to your-
 self and your local paper to back up these efforts by at least hav-
 ing your printed matter done locally.
